Here's Stephen Lazar's Social Studies [example](#).

A wiki set up by [Miss Calculate](#) for beginners. It's math-focused.
<http://sbgbeginners.wikispaces.com/>

and another one that's math-focused with a standards-based grading page set up by [Julie Reulbach](#).
<http://msmathwiki.pbworks.com/>

Here's the template I use for students to track their scores. It's from Word 2003 (Mac) and I've noticed it gets uglified in newer version. You get the idea though:
<http://www.box.net/shared/6xplu3btfy>

Most of what I started with was from Classroom Assessment and Grading that Works by Marzano. The template is obviously based on his example. I can't think of a book I was in love with though. All of the 'gurus' have some good ideas and you'll need to just take what you need. I've gotten a lot of practical stuff from [Dylan Wiliam](#), [Susan Brookhart](#) and [James Popham](#).
