

Given that we know: $E[aX + b] = aE[x] + b$.

Prove: $\text{Var}[aX + b] = a^2 \text{Var}[x]$

By definition, $\text{Var}[x] = E[x^2] - (E[X])^2$, so $\text{Var}[aX + b] = E[(aX + b)^2] - (E[aX + b])^2$

$$\begin{aligned} & \text{Var}[ax + b] \\ &= E[(ax + b)^2] - (E[ax + b])^2 \\ &= E[a^2 X^2 + 2abX + b^2] - (aE[X] + b)^2 \\ &= E[a^2 X^2] + E[2abX] + E[b^2] - (a^2(E[X])^2 + 2abE[x] + b^2) \\ &= a^2 E[X^2] + 2abE[X] + E[b^2] - a^2(E[X])^2 - 2abE[x] - b^2 \\ &= a^2 E[X^2] + 2abE[X] + b^2 - a^2(E[X])^2 - 2abE[x] - b^2 \\ &= a^2 E[X^2] - a^2(E[X])^2 \\ &= a^2(E[X^2] - (E[X])^2) \\ &= a^2 \text{Var}[X] \end{aligned}$$
